

## Fabricated and Induced Illness half-day conference

**Friday 26 January 2018**

Registration from 0915

Event will close at 1330

**We are pleased to announce that Dr Danya Glaser will be speaking at the Croydon Fabricated and Induced Illness half-day conference.**

**The event gives the opportunity to discuss and learn together on some of the most challenging issues when working with fabricated and induced illness, including:**

- Learning from serious case reviews
- Early Recognition – spotting early warnings
- The importance of focussing on the child and responding effectively to parental issues and worrying behaviours
- Effective management of referrals
- Understanding the roles of health and other professionals
- The importance of multi-disciplinary and multi-agency communication
- The importance of safeguarding supervision
- Recognising the importance of professional challenge

**This event is for managers and practitioners from health, social care, education, police and community and voluntary settings**
